Description:

MACHINIST

Summary: Washington County manufacturer of drilling equipment is hiring a fulltime Manufacturing Labor position to perform the following tasks. The company offers a full benefits package, including health insurance, dental insurance, 401k and a profit-sharing plan:

- Sets up and operates conventional machines and machining centers to fabricate various equipment per our product line.
- Studies blueprints, sketches, drawings, manuals, specifications, or sample part to determine dimensions and tolerances of finished work piece, sequence of operations, and setup requirements.
- Measures, marks, and scribes dimensions and reference points on material or work-piece as guides for subsequent machining as necessary.
- Selects, aligns, and secures holding fixtures, cutting tools, attachments, accessories, and materials on machines as necessary to machine parts as required.
- Calculates and sets controls to regulate machining factors such as speed, feed, coolant flow, and depth and angle of cut to established guidelines and procedures.
- Starts and observes machine operation to detect malfunctions or out-of-tolerance machining and adjusts machine controls as required.
- Verifies conformance of finished work-piece to specifications, using measuring and inspection tools as necessary.
- Performs routine maintenance tasks on machines as required.
- Confers with engineering and production personnel to resolve machining or assembly problems.

- Maintains a clean and organized work area and maintain all equipment, to like new appearance, according to maintenance plans and established procedures.
- Maintains a positive work atmosphere by acting and communicating in a manner so that you get along with co-workers and management.
- Ensures that safe work practices are followed and adhered to.

Qualifications and Additional Requirements:

- Two-year college or technical school; or two to three years related experience and/or training; or equivalent combination of education and experience
- High school diploma or GED
- Must possess a valid driver's license and a clean driving record
- Must be at least 21 years of age
- Ability to lift and move up to 50 pounds
- Subject to periodic and random drug testing

Description:

Field Inspector

JOB DESCRIPTION Orbital Engineering, Inc. is seeking an experienced Field Inspector to work at our Pittsburgh office supporting major client's projects as well as others that may be assigned. A successful candidate will inspect structural components at customer locations and ensure that structural deficiencies are recorded for customer use. The gathering of field measurements, conducting inspections and other wise observing existing conditions in a heavy industrial environment is a primary component of this position. Candidates must be prepared to readily accept these requirements and will be properly trained to work in these environments. Responsibilities include, but are not limited to:

- Detect possible defects and faults in structural systems and recommend or stipulate appropriate remedial measures for non complex defects.
- Accurately read and comprehend drawings.
- Learn job-related material primarily through oral instruction and observation which takes place mainly in an on-the-job training setting.
- Use graphic instructions, such as blueprints, schematic drawings, layouts, or other visual aids.
- Applies intensive and diversified knowledge in broad areas of assignments, especially projects concerned with unique or specialized problems.
- Relies on experience and judgment to plan and accomplish goals.
- Complete company developed training modules.
- Interfaces directly with the client's representatives as necessary.
- Certifies designs and drawings as appropriate.
- Other duties as assigned.

JOB REQUIREMENTS The successful candidate will have UP TO 5 years of experience with any of the following: General Inspection experience and/or experience working in the mining industry, steel mills or oil refineries.

Preference given to:

- Non-Destructive Testing (NDT)
- Certified Weld Inspector (CWI) credentials
- API tank inspection experience

Candidates must have a flexible schedule and quick response time in order to compensate for the customer's changing needs. Candidate

must also be willing to travel minimum of 15% of the year. While performing the duties of this job, the employee is frequently required to walk, stand, bend and climb ladders. The employee is regularly required to use hands to manipulate, handle, or feel; reach with hands and arms; and talk or hear. The employee must occasionally lift and/or move up to 50 pounds. Specific vision abilities required by this job include color vision, depth perception, and ability to adjust focus. Work in elevated or in tight, confined space type areas. Use of negative pressure, air filtering/purifying respiratory protection may be required. A commitment to excellence and hard work will be rewarded with a competitive salary, career advancement opportunities, and an excellent benefits package including medical, dental, vision, prescription drug, 401(k), and supplemental insurance. Orbital Engineering, Inc. is an Equal Opportunity Employer, EEO/AA/M-F-VD. Orbital Engineering, Inc. seeks diversity among its employees.
